

MAHAKUMBH – AI POWERED EMERGENCY RESPONSE COORDINATION PLATFORM

BY: MANVI NAYAK
manvi2605nayak@gmail.com

Problem Statement

Challenges During Large Public Gatherings

- Massive crowd density
- Delayed emergency response
- Resource coordination issues
- Lack of real-time situational awareness
- Manual incident management
- Public safety risks

Slow Response

Higher Risk

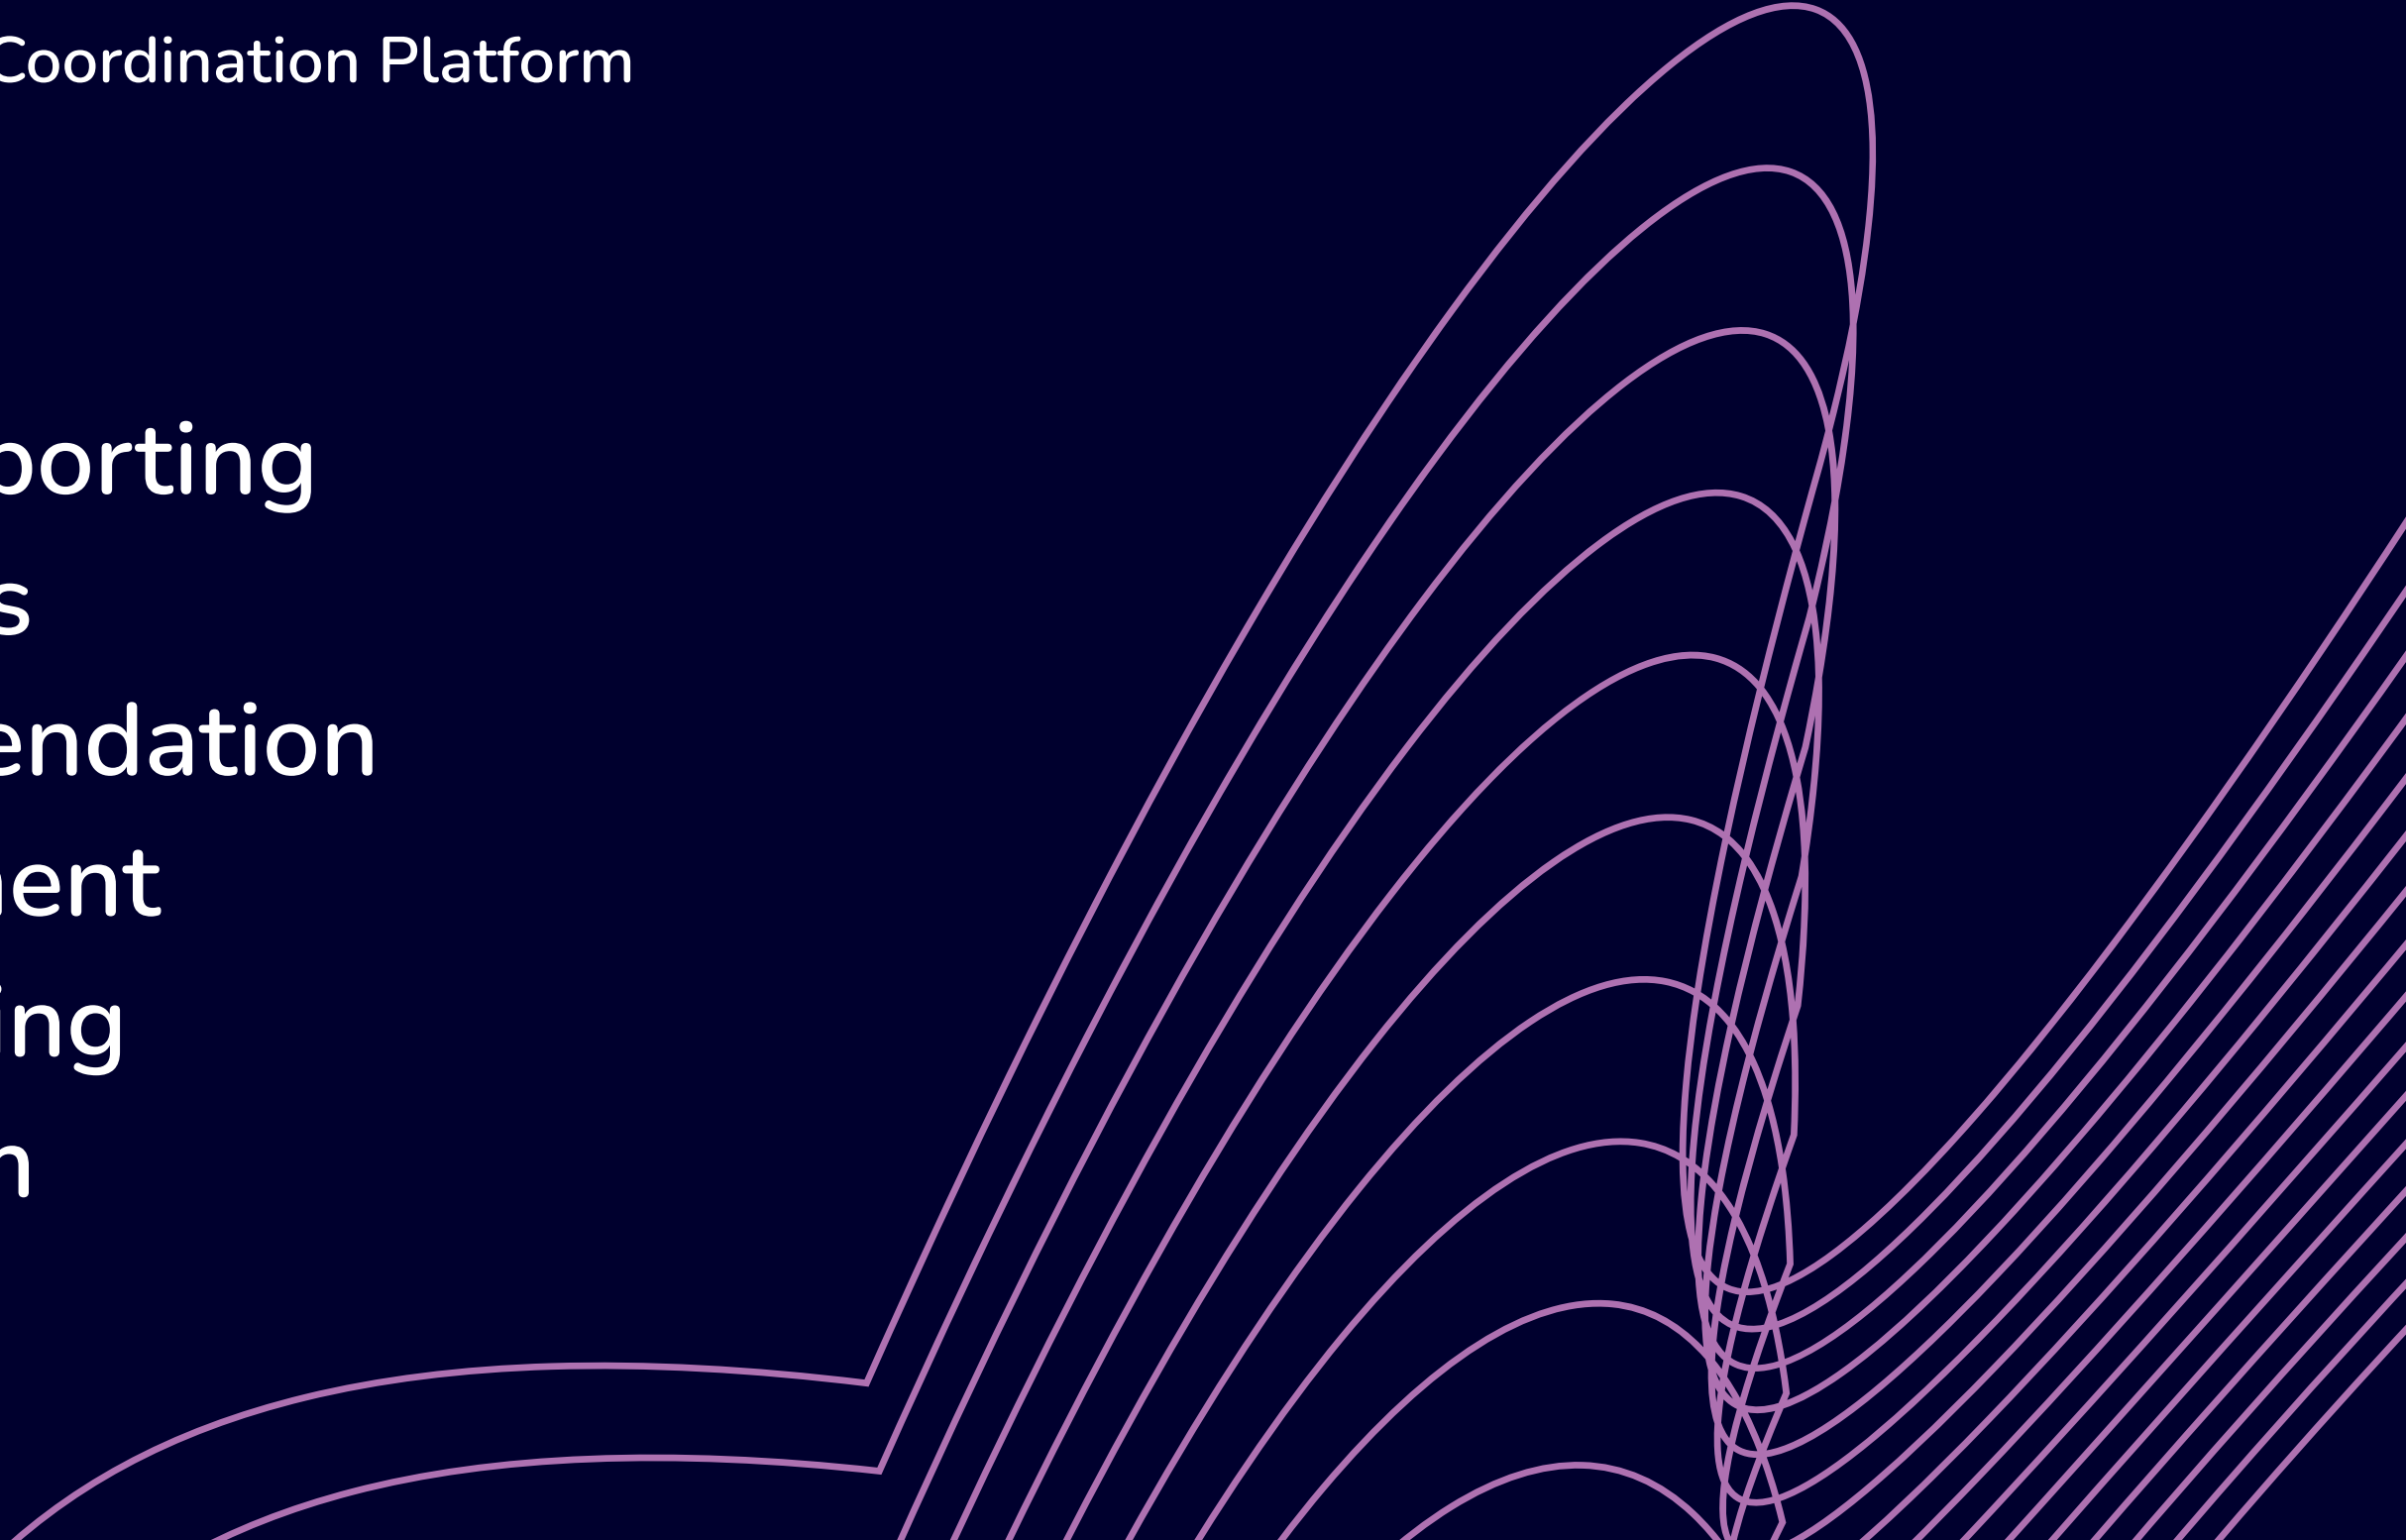

Public Safety Issues

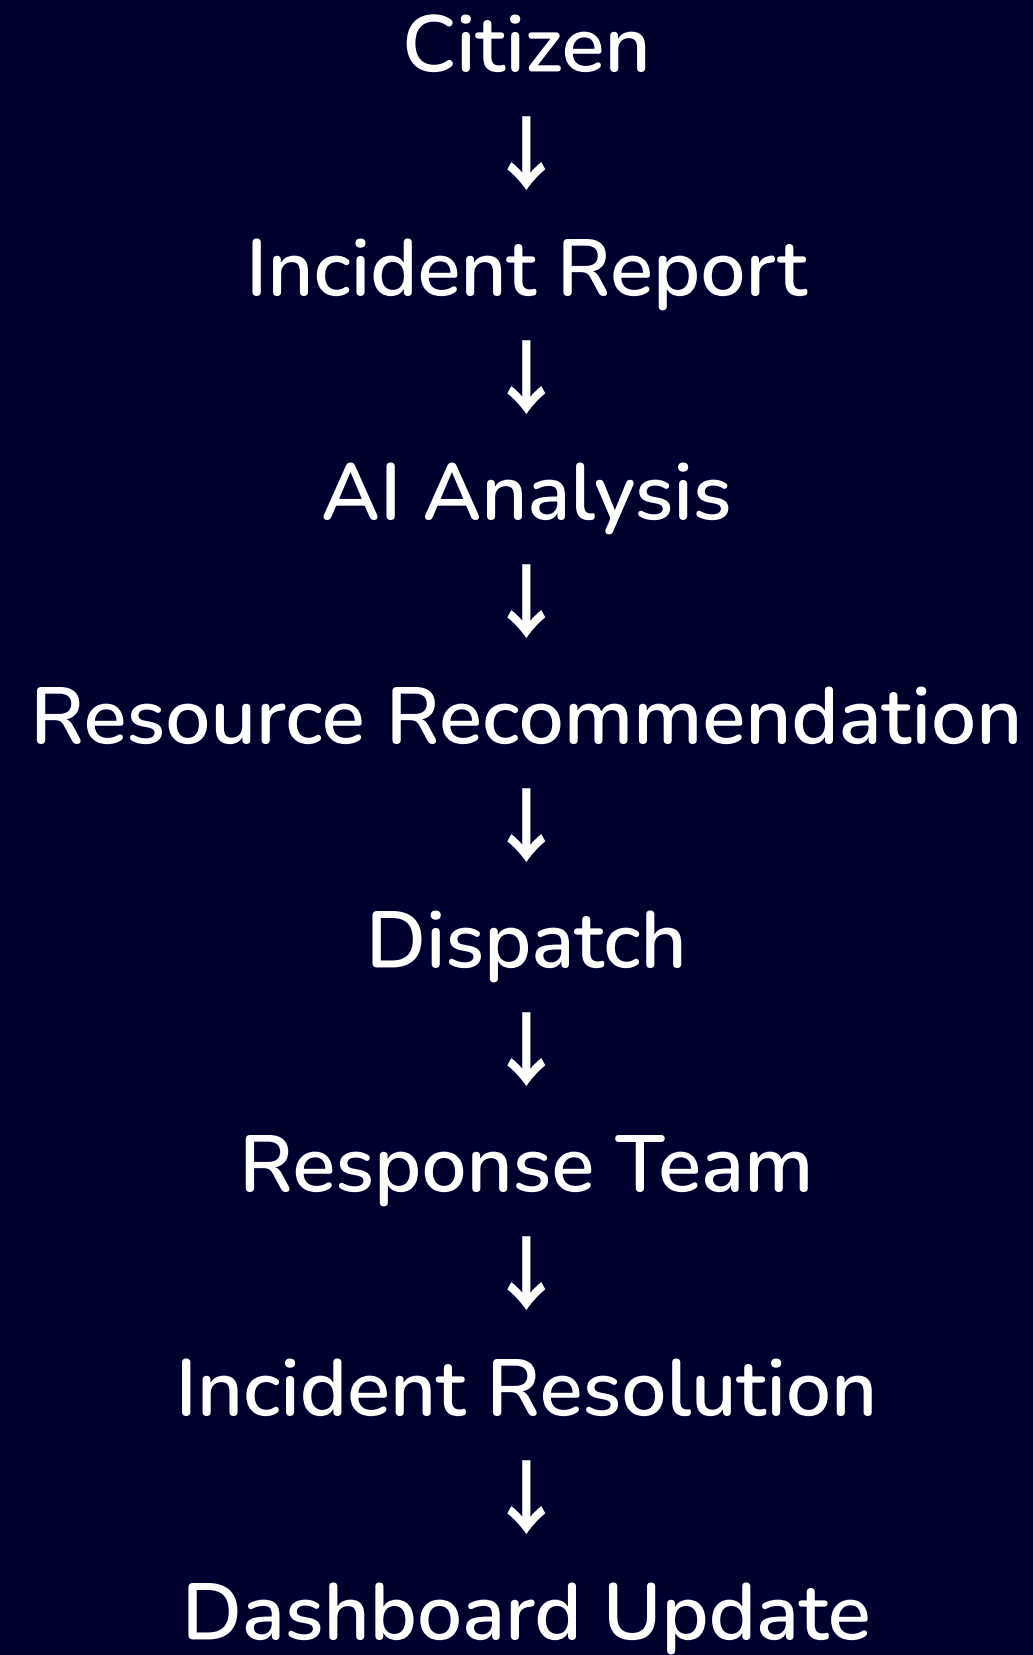

Proposed Solution

AI-Powered Emergency Response Coordination Platform

Our platform enables:

- Citizen Incident Reporting
 - AI Incident Analysis
 - Resource Recommendation
 - Dispatch Management
 - Real-Time Monitoring
 - Public Alert System
- 

System Workflow

Key Features

AI-Powered Incident Analysis

Real-Time WebSocket
Monitoring

Smart Resource
Recommendation Engine

End-to-End Emergency
Response Workflow

Automatic Incident
Resolution

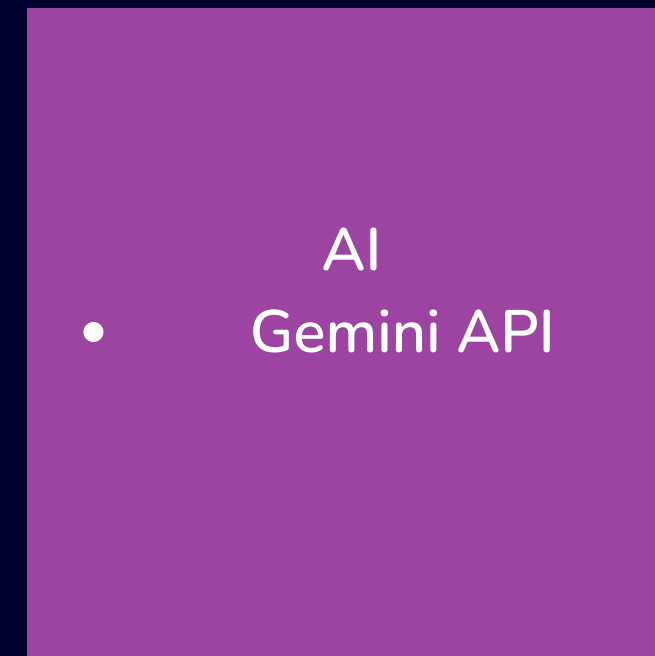

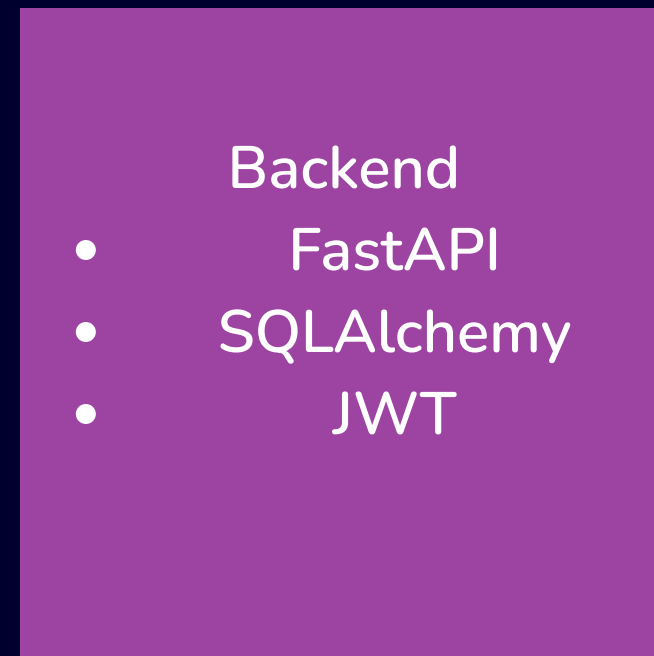

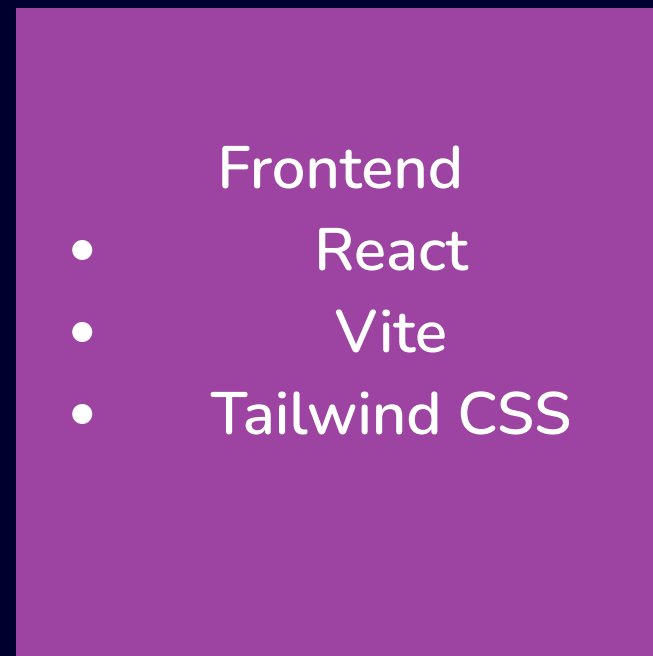

Live Command Center
Dashboard

Role-Based Emergency
Operations

Public Live Alert System

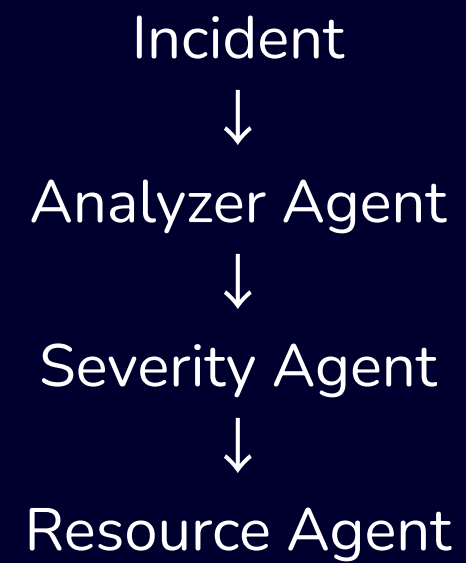

Scalable AI Architecture with
Optimized API Usage

System Architecture

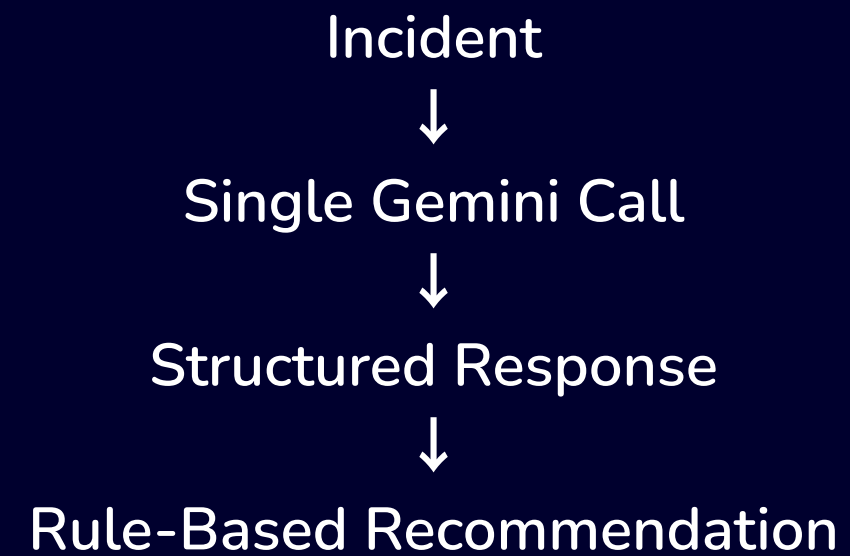

AI Architecture

Previous Approach

Problem: Gemini API Quota
Exhaustion

Final Approach

Benefits:
Faster
More Scalable
Lower Cost

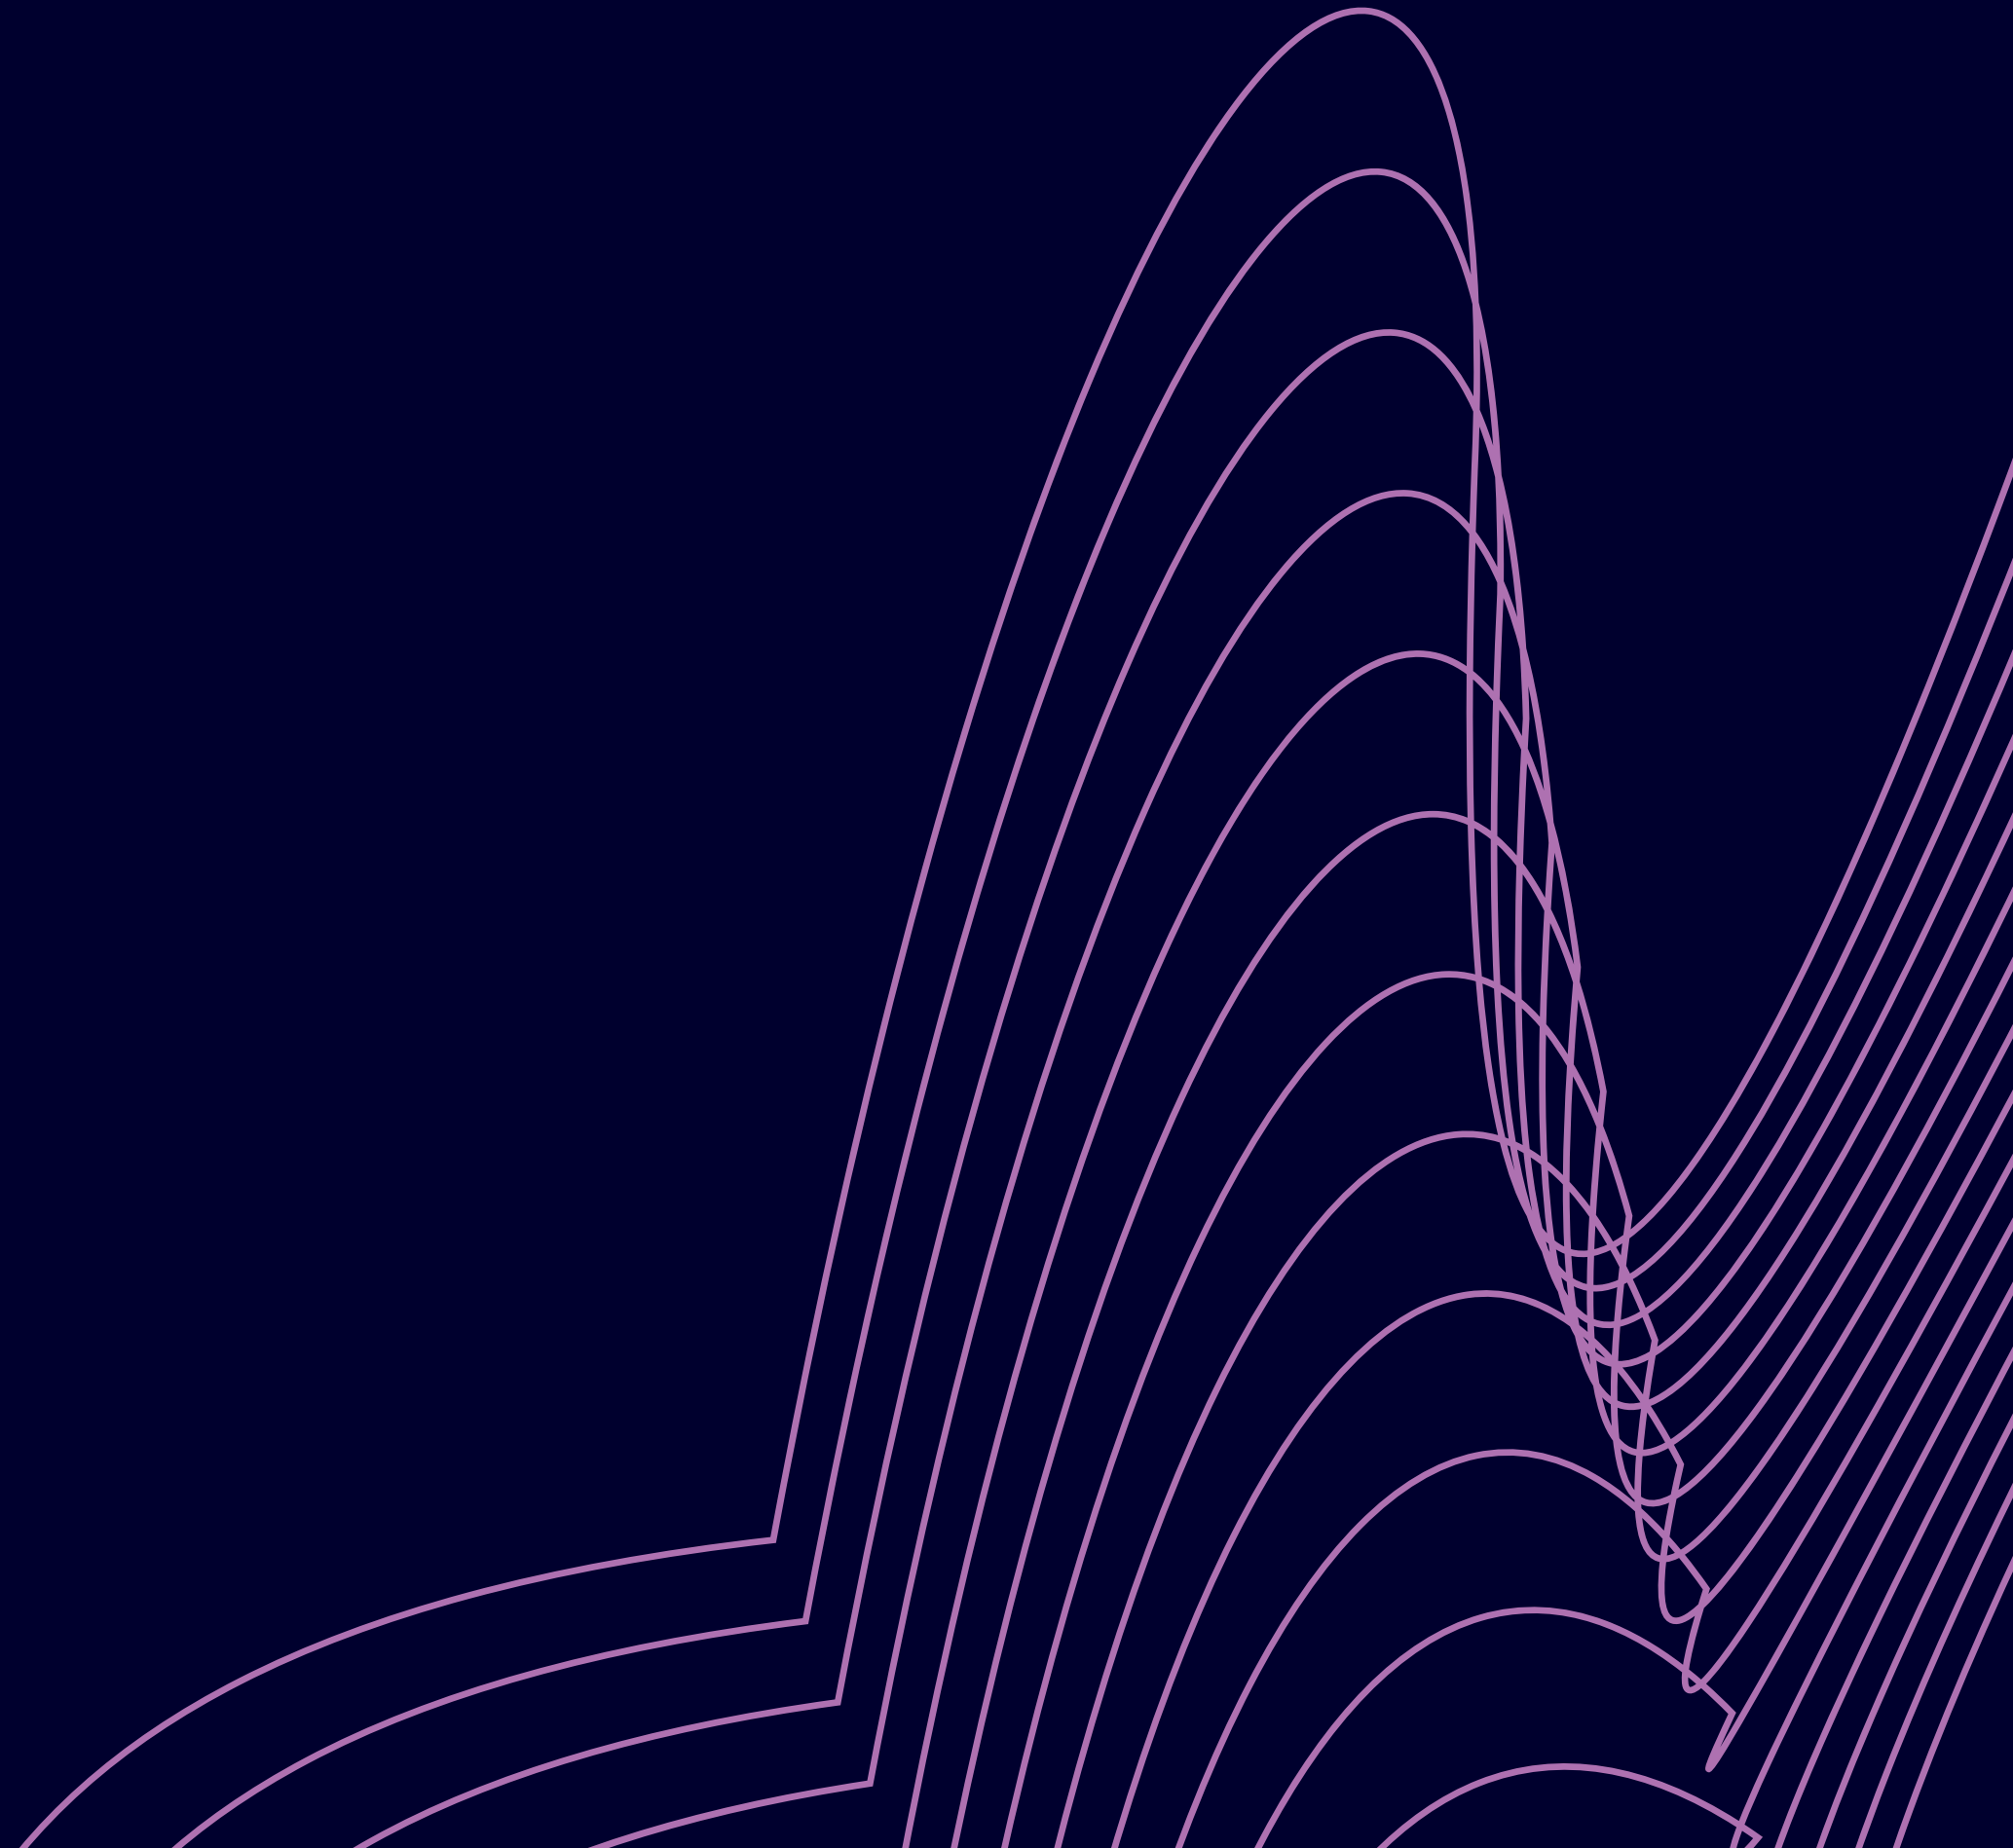

Impact & Future Scope

Impact

- Faster Emergency Response
- Better Resource Utilization
- Improved Public Safety
- Real-Time Coordination
- AI-Assisted Decision Making

Future Enhancements:

- PostgreSQL
- GIS Mapping
- Mobile App
- SMS Alerts
- Predictive Crowd Analytics
- Drone Monitoring

Thank You
